

## AED Smart Cabinet installed in Workman Township

**WORKMAN TOWNSHIP, Minn.**—On September 6th, 2024, Workman Township, north of McGregor, MN, coordinated the installation of a life-saving AED Smart Cabinet device.

The system was installed on the North side of the township hall at 24301480th St (CR3) by Jay Pitonyak (Advocates for Health) and local electrician Karl Often (White Pine Electric). The AED is easily accessible 24 hours a day by the local community. We highly encourage residents and emergency personnel in the local area to become familiar with the AED equipment. Instructions are posted and additional training is available. We are grateful for the monetary donations from the Tamarack Snow Flyers, Grand Timber Bank, McGregor Fire Department, and American Legions. Donations can be coordinated through

**AED INSTALLATION:** Jay Pitonyak (Advocates for Health) and local electrician (Karl Often) helped install an AED Smart Cabinet at Workman Town Hall.

the Workman Township Treasurer to help continue with maintenance and updates on the AED system. Our heartfelt

thanks go out to Jim Berg, former Workman Township Chairman, for his vision and guidance on this effort.
